Human Resources
Department

Dear Sir / Madam

I am currently a final year student pursuing an Honors degree in Geographic Information Science majoring in Environmental Biology at University of Namibia, who values opportunities as they create platforms to enhance career development and professionalism. I firmly believe that opportunities are the bridges that connect an individual to their lifelong career. I have managed to acquire substantial theoretical concepts to date and hoping to attain a platform to exercise the skill sets and knowledge. My interests expand into remote sensing, spatial analysis in statistics and planning, cartography and mapping, ecological field techniques, conservation biology and biodiversity, Integrated Natural Resource and Project Management.

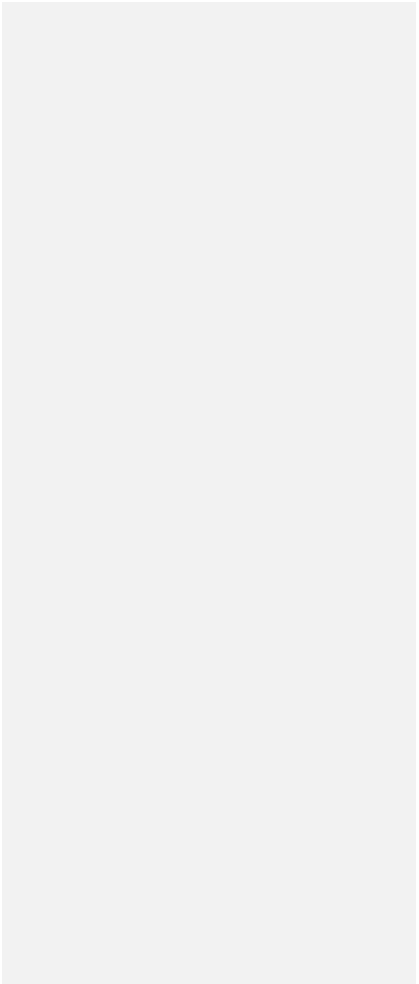

The COVID-19 pandemic has placed challenges with regards to various organizations in hiring interns and I am expected to complete an internship of minimum 2 -3 months for Geo-Information Work Integrated Learning module in order to graduate in 2022. Therefore, receiving this opportunity will be highly appreciated.

Key Competences

- An able and effective communicator at various levels
- Self-motivated and ability to relate well at all levels
- Ability to work well in a group and to leverage others
- Eager to learn more from all colleagues and superiors
- Ability work in a multi-culture environment

Computer Skills

- Microsoft packages
- Arc Map
- Q GIS

Thank you for taking your time to review my resume. I can also be reached at: +264812556780/5780025 or mbakapua@gmail.com/utarera13@gmail.com

Sincerely,

Utarera Katjavivi
