To Whom It May Concern

**Re:** Reference letter for Ms. A.M. Timoteus

Dear Sir/ Madam

I am pleased to write a letter of recommendation for Ms. Timoteus, who is currently in her final (fourth) year towards a Bachelor's degree in Environmental Biology at the University of Namibia. I was her lecturer for her second year module, namely: Biometrics II, third year modules, namely: Biosystematics I and Ecophysiology.

Auguste is a hardworking student who is actively and constructively involved in class discussions. She is a very determined and committed young lady who's always willing to help when asked and gets along very well with her classmates. She is particularly interested in the conservation of biodiversity and therefore will benefit greatly if she were granted an opportunity to do an internship in a similar direction. Her academic performance is very good, as is evident in her academic record.

I think Ms. Timoteus has great potential to become a productive citizen of our country, especially in the field of ecology, and therefore recommend her for any internship in her area of interest.

Please do not hesitate to contact me for further information.

Yours Faithfully

E. Kwembeya (PhD) Senior Lecturer  
Department of environmental Sciences  
University of Namibia
