RE: CCF Namibia Internship Position

I'm hereby applying for the **CCF Intern Position** as advertised on your website.

I'm a 3rd year Bachelor of Science student majoring in Biology at Namibia's University of Science and Technology. I am convinced that starting my career with your organization would provide the ideal platform in terms of key training and experience that will broaden my knowledge base in this field of work.

I find the field of ecology extremely fascinating, and the conservation of Namibia's wildlife enables others in the country to have the opportunity to foster the same interest. Throughout my studies at NUST I have acquired skills and experience through my course work in the area of Ecology and feel strongly that I will be able to work effectively in this field. I have gained extensive experience in data collection and have a strong understanding of modern research and scientific report writing with knowledge of advanced concepts of biology and chemistry. through this I have obtained strong verbal and written communication skills. Apart from that I describe myself as a motivated, ambitious, and prudent individual who is able to take up new challenges. All that having been said, I am confident that I would be a great addition to your team.

I am interested in gaining real world work experience with the Cheetah Conservation Fund organization and I would appreciate the opportunity to work alongside the talented and experienced group of individuals within the organization. I would love to have the privilege of serving as a CCF intern an experience which would give me the further exposure I would need to advance my career.

Attached, please find my CV and supporting documents for your scrutiny, however I will avail the results of my third year once they are released.

I trust the above to be in order and hope to hear from you soon.

Yours truly,

Allison Stramis
