**B: VETERINARIAN CERTIFICATE IN RESPECT OF DOGS FOR EXPORT TO THE REPUBLIC OF NAMIBIA**

I, JULIE HAYES, DVM a veterinarian

authorised thereto by the veterinary administration of USA (name of country) certify that the animals described in Section A:

1. Have as far as I can ascertain been continuously resident in this country since birth or have been continuously resident in the exporting country or imported from Namibia in the previous 6 months.
2. Originate from an area which is not under official veterinary restriction by the veterinary administration of the exporting country for any disease to which carnivores are susceptible.
3. Did not, as is possible to determine, come into contact with animals infected or suspected of being infected with rabies.
4. Have valid rabies vaccination, as stipulated below or have been exempted from vaccination<sup>1</sup>

a) Rabies vaccination dates of animals over **3 months old** being exported

	Date	Type of vaccine	Batch number
1	06 AUG 2021	KILLED VIRUS ZOETIS DECN502 -1	236507A
2			
3			
4			
5			
6			

Or

b) Rabies vaccination dates of dam/mother for animals being exported which are **less than 3 months old**

	Date	Type of vaccine	Batch number
1			
2			
3			
4			
5			
6			

<sup>1</sup> - The vaccine used must be a strain of anti-rabies conforming to a potency standard recognised by the WHO.

- The animal must have been vaccinated at least 30 days but not longer than 12 months prior to export in the case of primary vaccination
- Animals under 3 months of age may not be vaccinated and are considered to have a valid vaccination provided the dam of the animal was vaccinated 30 days but not longer than 12 months prior to giving birth. Such animals must be vaccinated at 3 months of age in the Republic of Namibia and the owners must provide proof thereof to the state veterinarian.

5. Unless the country of origin is free of the disease ( An international veterinary certificate/ OIE certificate must be attached attesting that the Country is free from indicated diseases) the animals **MUST** have been tested with **negative results** within **30 days of export**, for the following conditions at an officially approved laboratory, using testing method described in the OIE Manual Standards for Diagnostic Tests and Vaccines or the method indicated.

Disease	Date tested	
Brucella canis : serum agglutination	24 AUGUST 2021	NEG
Trypanosoma evansi: card agglutination and Giemsa blood smear	COUNTRY FREE	
Babesia gibsoni: Immunofluorescence antibody test and Giemsa blood smear	24 AUGUST 2021	NEG
Dirofilaria immitis: microfilarial filtration test	24 AUGUST 2021	NEG
Leishmaniosis: Indirect fluorescent antibody	24 AUGUST 2021	NEG
Or ELISA	N/A	
Or Direct agglutination	N/A	

NOTE: animals subjected to a post-importation quarantine will at the discretion of the Director of Veterinary Services of Namibia be re-tested at the importer's expense.

6. Unless the country of origin is certified free of the disease( certificate must be attached) under paragraph 5, the animals have been treated for the following conditions as prescribed below:  
 Trypanosoma evansi: treatment with Suramin or Diminazine aceturate according to manufacturer's instructions until export.

Date NA Product NA Dosage NA

Dirofilaria immitis: treatment at the required intervals from date of negative test until export with

- Diethylcarbamazine (5-6mg/kg/per os daily) or
- Ivermectin (6 micrograms/kg per os monthly) or
- Milbermycin oxime (0.5 mg/kg per os monthly) or
- Moxidectin (3 micrograms/kg per os monthly) or
- Selamectin (6mg/kg) (Revolution) Prophylactic only

Date 08 SEPTEMBER 2021 Product HEARTGUARD PLUS Dosage 272 MCG

Date ..... Product ..... Dosage .....

Date ..... Product ..... Dosage .....

Treatment for Dirofilaria must continue for 6 months after arrival in Namibia. I have informed the owner/person in charge of the dog of this condition and I confirm that this person has sufficient amounts of drug used in his/her possession to carry out the required treatment (Please note that heartworm remedies are not easily available in Namibia and must be imported by the importer at the time of importation of the dog.)

8. Have been examined clinically by an official veterinarian within 10 days of export and were found free of internal and external parasites, contagious and infectious diseases to which the species is susceptible and fit to travel.

9. Will be shipped in container which conform to IATA regulations, which will be either new or suitably disinfected and fumigated before loading and are of such a nature that contact with other animals of a lesser health status, en route, is prevented.
