Cheetah Conservation Fund

Dear Bruce Brewer,

I am a person who adores animals and wishes to understand more about their behaviour. I grew up around animals, more specifically domestic cats. Over the years my curiosity and love for felines grew bigger and bigger. This passion for animals and the wish to work closely with them led me to study in environmental and wildlife management. This school program taught and still teaches us various topics and techniques to accomplish many sampling procedures. Through different classes we acquired knowledge on proper manipulation of different animal species. I believe I am now comfortable manipulating specimens as well as careful when doing so. Through various work experiments which I did not have any previous training in, I discovered that I am a fast learner and that I am capable to properly complete small jobs without extra help. I am independent and organized which allows me to be left alone without having doubts that the work will not be done properly.

With the following, I believe I could be a good addition to the team for the duration of the internship. It will also be a good opportunity for me to learn hands on and to gain further knowledge on different practices.

In hope to be part of your family for 6 weeks or more.

Cordially,

Keliane Nadeau
