Testimonial for Kristof Simon

It is my pleasure to write this testimonial for **Kristof Simon**, who was a student participant at B2Gold Namibia's inaugural Summer School, hosted from them 1st to the 9th of December 2019. The programme was aimed at exposing students to activities and approaches within the environmental department of a mine, with emphasis on description of the vegetation communities around the Otjikoto Gold Mine.

As part of the programme, **Kristof** was trained on various field techniques for vegetation data collection, soil sample collection, data management, analysis and presentation. **Kristof**, worked as part of a team, where problem solving and critical thinking skills were encouraged and developed.

I highly recommend **Kristof** for any position that he may wish to venture in to.

Should you have any questions, please do not hesitate to contact me on the provided contact details below.

Kind Regards,

Ms. Angie Kanandjembo
Environmental Manager
