Application for an internship for three months (in 2022)

Dear Ladies and Gentleman,

I grew up in a veterinary clinic. Due to that my interest towards this area was aroused pretty early. As a child, I was already standing in the treatment room and inculcated veterinarian basics.

My enthusiasm for Africa - especially for big cats - came at a young age as well because of some vacations in countries like Namibia, Botswana or Zambia.

Finally I have the chance to unite both passions.

I really like spending my time with animals and I do enjoy it.

My character is dedicated, open minded and ready to gain new experience, which the CCF can offer without any doubt.

I hope I was able to convince you and I would be pleased to get a positive answer back.

With kind regards,

Eileen Guehne
