01 February 2021

Dear Madam or Sir,

I am writing to express my interest in an internship at the Cheetah Conservation Fund starting September 2021. Currently, I am enrolled in the undergraduate study program Bioengineering B. of Sc. at Rhine-Waal University of Applied Sciences in Cleve, Germany. As a fifth semester student I am looking for a 20-week internship as part of my curriculum.

I would have loved to introduce myself personally to you during my visit in December last year. Unfortunately, the Conservation Fund was closed during the holidays and later on under quarantine.

While browsing your website my attention was caught by your diverse program for internships and research opportunities. Especially the gene technique research stands out to me. For me personally, the gene research has caught my interest when I worked in the molecular pathology and evaluated mutations using FISH.

I would like to broaden my knowledge in a laboratory setting while staying in a foreign country that I learned to love during my travels.

The study course has allowed me to gain first-hand practical experience in a laboratory. I am able to work well in an international team, learn independently and complete tasks while paying close attention to details.

Please review my attached CV for additional details regarding my expertise and achievements. In case any questions remain, do not hesitate to reach out.

Thank you for your consideration, and I look forward to hearing from you.

Yours sincerely,

A handwritten signature in dark ink, appearing to read 'L. Mutzberg', written in a cursive style.
