Dear Miss Laurie Marker, PhD:

I am writing in response to your advertisement for Student volunteer. I wish to apply for student inthership in Cheetah Conservation Fund in Namibia. After reading the job description I`m certain that I have abilities, some experience and and passion that you are looking for.

Ever since I started learning at the high school level, I have been passionate to things: better knowing animals world, caring of animals and asking questions and looking for answers. I was dreamming to become veterinarian. As a PhD student of biology on Department of Biology, Adam Mickiewicz University in Poznań in Poland my main goals are to gain experience in environmental, molecular biology with connecting to veterinary science. Mostly I am interested in interaction between reservoirs, vectors and pathogens. Main subject of my studies are ticks and ticks borne pathogens.

I have a passion and abbilities for working in field and in lab and could not imagine myself in any other profession. I truly believe that we are all lifelong learners and I would love to learn more with the team of the Cheetah Conservation Fund (CCF).

Please let me know, if there are any other details you need. Meanwhile, I look forward to hearing for you.

Sincerely,

Justyna Liberska
