

Hello, my name is Anthonin Dupuy, I am currently in my last year of Bachelor's degree of biology ecology, option nervous system and animal behaviour at the university of Nantes, France. To validate my last year of studies, I have to do an internship of at least 3 weeks from the 23rd March to the 17th April. Following this internship, I will have to write a report, and an oral defense. This internship isn't rewarded.

Seeking to work in the domain of the protection and the conservation of biodiversity and more mainly in the study of carnivores in the wilderness, I would like to know more about the communities' or species' ecological monitoring, ecosystemical conservation, animals behaviour, and the relations between the local population and animals. Furthermore, I'd like to understand how the protection campaigns and research groups fall into place, and which are the goal of a study done by conservation biologists.

That's why I address myself to you, your work is indeed what I'm looking for, I'm very passionate and interested about it particularly, this is why I would like to get more experience and improve my knowledge by your side. I have a solid basis in ecology thanks to the university, and it's been 2 years since I am doing biostatistics, I know different methods, or calculation rules for ecology. Beside the university, I could develop my knowledge on conservation, and raptor birds' protection in result of my internship in a falconry. I also interned in animals sector, with horses and dogs. I also keep up to date with the last scientific publications at this subject, and I am principally interested in the conservation of felines.

This internship would be for me the occasion to learn more about the work concerning conservation, its actors, and what are its scientific goals beside the public. I am very motivated and passionate, I could move to another country if I had to. I am used to the nature, I'm not afraid of wild animals. I am looking forward to any proposal/suggestion from you, or other, and of course if you have any contacts or informations I am taking them with pleasure.

You can contact me via mail here: anthonin.dupuy@hotmail.com and by telephone at +33771699353

Waiting for a favorable reply Yours truly,

Anthonin Dupuy

P.S. Please find enclosed to this mail my CV
