**RE: INTERNSHIP APPLICATION**

Dear Sir/Madam

I am Patemoshela Kashikola a 4th-year student at the University of Namibia, studying Bachelor of Science in Environmental Biology (Honors).

As an emerging biologist who is keen on conserving and preserving of natural resources, I would like to do my internship at Cheetah Conservation Fund during my summer holiday. I am interested in helping with research projects, assisting with data collection, data analyses and writing literature and assisting with community projects. And tracking, monitoring, and counting of animals. Moreover, I would also like to gain experience in capturing and release of threatened species. This will help me gain more practical experience in fieldwork techniques that will add to my experience that I have already gained throughout my course, and this will help me with my career in the future.

Thank you for your time and consideration.

Kindest Regards

Patemoshela Kashikola
