Dear Sir/Madam

APPLICATION FOR INTERNSHIP: NATURAL RESOURCE MANAGEMENT

I, Victoria Mulyuu, a second year student studying for my Bachelor Degree In Natural Resource Management at the Namibia University of Science and Technology (NUST). I am required to do an Internship as one of my 3rd year modules. With great interest I hereby request for an admission as one of your 2021 intern. Presenting me this opportunity will allow me to build field work experience in Nature Conservation and Resource managing and while acquiring my knowledge I am carrying out a crucial academic requirement, Work Integrated Learning (WIL).

I'm intensively passionate about nature, wilderness, animals and the environment. Studying Natural Resource management allows me the chance to understand ways on how to conserve, protect and maintain healthy, functional ecosystems as well as ways on how to protect and conserve threatened animal species. Through practical, field work and excursions, I have acquired skills on field management, technical skills, plants and animal identification and so forth. Your work at Cheetah conservation fund Interests me a lot. The conservation, research and education on cheetahs that you do in your organization interest me a lot. I believe I will do great at your organization and I, as a student will learn a lot.

As an individual, I'm flexible; thrive under pressure, honest, straightforward and reliable. I will appreciate the chance to work in your organization. I am a fast learner and therefore will be able to carry out any tasks entrusted to me.

I would be delighted to be granted an opportunity to personally have an interview with you. Please accept my attached Curriculum Vitae and feel free to contact me at your earliest convenience. Thank you for your consideration.

Yours Sincerely

Victoria Mulyuu
