

Dear Sir

In April 2020 I will graduate from the university of Namibia with a diploma in Natural Resources Management under the faculty of Agriculture Water and Forestry. I am motivated to apply for any available internship to enhance my skills acquired from the university and become one of the feeding hands to the nation.

My strong work ethic is evident from the fact that I have served as a student registration assistant for the University during my 2017 academic year, have carried out nursery work as part of my field attachment at the directorate of forestry at Grootfontein. These experiences have enabled me to gain realistic view of the demand and challenges of the conservation and rehabilitation of the environment.

With the combination of these professional and academic experience, I am looking forward to provide me with any available internship opportunity within the tree planting section.

Looking forward to hearing from you

Yours sincerely

Nehunga Magdalena

(A Natural Resources Management graduate 2020)
