RE: Internship: Ms S. Amakali

Ms Amakali is in her second year of her BSc (Hons) Environmental Biology degree at UNAM. I have been teaching her the module Field Ecological Techniques in the second semester. Some of the other modules in her second year are Introduction to Microbiology, Plant Form and Function, Cell Molecular Biology and Genetics, Animal Form and Function, Introduction to Ecology and Social Geography.

She is currently in search of any internship for this year. We do encourage students to do temporary internships as we believe that this will provide them with the necessary experience in the job market.

I would appreciate it if such an opportunity becomes available for her to learn from the work place. If you have any further questions, please do not hesitate to call me.

Kind regards

Dr. C.J. Hay
