

Dear Ms.

I am writing to apply for an internship position at Cheetah Conservation Fund. I am currently a second year student of Nature Management at Centurion Academy in Klerksdorp, North West. I would very much like to be part of your program where I can put my skills and education to good use, therefore I am in search of an internship or job opportunity for my third year, the year will include my practical that I need to finish for my studies to receive my diploma.

I am passionate about conservation and am also a hard-working person that takes responsibility. I am adaptable to situations and am eager to work with wildlife. I have a passion for the outdoors, nature and art.

I am ambitious and motivated, therefore I have a vision for myself, which is to accomplish knowing how to take care of different animal species, to teach others how to take care of our wildlife and also to protect the wildlife species in danger. It is also my goal to make a positive contribution to your program with my ability to be an enthusiastic and a reliable person.

I am seeking for an opportunity for my practical year, which will allow me to broaden my knowledge about conservation, animal caretaking and working with different people in different aspects of the job.

Looking forward hearing from you at your earliest convenience. You can reach me by email at vvdmerwe2000@gamil.com, but I am currently still in South Africa busy with my last exams, therefore I cannot be reached on my number in Namibia, but my South African number. +27 73 666 6491

Sincerely

Vicky van der Merwe
