Re: Internship Application

This letter serves as an application for work-based learning (internship) at your highly esteemed organization

I am a fourth-year student pursuing a degree in Bachelor of Microbiology at the University of Namibia therefore humbly requesting to be placed for an internship at your organization. As a Microbiology student, the nature of my degree course has prepared and assisted me to acquire the potential knowledge with regard to any microbiology related activities. After going through your website, I learned of the genetic lab where students who wish to do internship can apply to, and I'm interested as I wish to apply and transform the theoretical skills I have mastered at school more into a practical way to gain hands on experience and competencies needed for my future career, including self-employment.

I am a conscientious person who works hard and pays attention to detail. I'm flexible, quick to pick up new skills and eager to learn from others. I also have lots of ideas and enthusiasm. I am a team player who forges good relationship with colleagues and consider myself to be well respected by those around me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours Faithfully

E. K. Goma
