

Internship application letter

Dear Sir? Madam

My name is Immanuel K Aushona, a 4th Year student at the University of Namibia. Currently enrolled for a four-year Bachelor of Science (Hons) degree in "Environmental Biology" (major) and Geology (minor). Hereby writing to enquirer about any possible internship your organization is offering. I would like to join any Environmental and Health Department, seeking to leverage strong data entry and lab maintenance skills, research, field and laboratory experiments skills gained through lab experience at the campus

I'm available as for the month of 22 June-17 July. The period of the academic holiday. At this level of academic training in this program, we are exposed to advanced theoretical concepts in ecology, geology, GIS (geographic information system), and environmental science with issues pertaining to environmental protection and sustainable development.

An internship opportunity will be a great help for me, as it enhances practical experience within relevant fields and strengthen the understanding of theoretical concepts and opportunities to interact in a professional environment.

For any open chance of an internship with you, please let me know at your earliest convenience at my email address aushonaimms@gmail.com or cell number 0816787083

Thank you

IK Aushona
