Cheetah Conservation Fund
Internship
Summer 2020 Position
200 Daingerfield Rd #200
Alexandria, VA 22314

Dear Cheetah Conservation Fund,

If I was offered the chance to intern at the Cheetah Conservation Fund, I would give my love for learning, research experience, adaptability, hard-work, and patience to this program. Over the next few months of being a part of a research program at UC Irvine, I will gain lots of experience and knowledge regarding problem-solving and finding solutions in efficient ways. Additionally, I will hold the knowledge to properly manage data and react to specific scenarios. I will do whatever is needed to help give back to the Cheetah Conservation Fund community and make my work worthwhile.

From this experience, I hope to gain experience working alongside the Cheetah Conservation Fund staff. Gaining this experience would help enhance my knowledge and skills related to animals. Working alongside the Cheetah Conservation Fund staff will give me hands-on experience that will help me decide on a specific major as well as possible future careers. I live close to the San Diego Zoo Safari Park and visit on a regular basis. I am an active member and love observing what keeps the animals and conservation efforts thriving. In my college classes so far, I have found a strong liking of biological science courses. I believe this internship will allow me to use my passion to give back to the community at the Cheetah Conservation Fund as well as serve as a basis for possible future careers.

Thank you for taking the time to review my resume, letter of intent, and unofficial transcript. Please reach out if you have any questions or concerns.

Sincerely,
Daniela Rugeti
