To whom it may concern

RE: Letter of recommendation: Ms Hilma H. N. Tomas

I am a Senior Lecturer at the Department Biological Sciences in the Faculty of Science at the University of Namibia.

Ms Tomas is currently in her fourth year BSc (Hons) Environmental Biology in our Department. She was in my Integrated Natural Resources Management II and Disturbance and Restoration Ecology modules. She also did Conservation Biology and Biodiversity, Ecosystem Ecology, Geographic Information Systems, Integrated Natural Resources Management I and Biogeography.

I have come to know her as a dedicated and hardworking student, always willing to learn with a sparkling personality. I also found her to be very determined and committed and gets along very well with the rest her class mates and with the staff members at the department. She has the ability to work alone if necessary.

I personally believe that she will excel in any venture that she may pursue in future. I have no hesitation in recommending her for any employment she may apply for. If you need more information, please do not hesitate to contact me via phone or email.

Sincerely

Dr. C.J. Hay
Senior lecturer
Department: Biological Sciences
