RE: Internship Application

I am writing to submit my application for the Cheetah Conservation Fund (CCF) scholarship. I completed my Bachelor of Science in Wildlife Management and Ecotourism degree from the University of Namibia. I have a strong passion for research and nature conservation.

Since my first year in my undergraduate course, I have worked with various scholars who have inspired me academically and have made me aware of the importance of conservation. I am very conscientious, and like to pay attention to detail and obsess over tasks until they are completed. Over the past few years, I have familiarised myself with the scientific method and surveying techniques. Thus, I am confident that I can be a valuable member of any team. I am particularly interested in large mammalian carnivores and would love for a chance to work with such mammals at CCF.

I have been to CCF before for a week-long excursion when I was still in undergraduate school. I fell in love with the work you do there, and would love for a chance to be part of your team and help contribute to conservation efforts. In addition to taking care of endangered wildlife populations, I would also like, in the long run to contribute innovative ways to mitigate human-wildlife conflict and give wildlife a chance to thrive.

I hope that I will be considered for this internship. Thank you for your consideration.

Yours faithfully

Sitali Lucky Mbeha
